

Shubham Singh Bisht - Review Form (Performance Evaluation - January 2026)

Employee Details

Employee Name : Shubham Singh Bisht
Employee Id : CA-IND-001205
Job Title : Developer - I

Questions

Describe a project where you demonstrated strong ownership and took proactive steps to overcome challenges or improve outcomes.

Shubham Singh Bisht

19-Dec-2025, 1:14 PM

Performance: 4/5 ★ Exceeding Expectation

During my initial phase as a fresher, I demonstrated strong ownership while working in a shadow role on the IBL Banking CRM project. Since the project was complex and business-critical, my senior team members assigned me small, incremental tasks to help me gradually understand the system and processes. I proactively took responsibility for these tasks by first understanding the end-to-end business flow, including lead management and CRM workflows, before implementing any changes. Even while shadowing, I made it a point to analyze configurations, review existing logic, and clarify requirements with my seniors to ensure my work was accurate and aligned with business needs. Whenever I faced challenges, I did not limit myself to just completing the task. I independently researched solutions, validated my understanding, and shared my findings with the team. This approach helped me complete tasks with minimal rework and gradually build confidence and trust within the team. Currently, I am following a similar ownership-driven approach while doing shadow work on the Infosys project. I actively observe senior developers, understand project architecture and coding standards, and take ownership of learning the system thoroughly. I proactively ask questions, document learnings, and apply feedback to continuously improve my technical and functional skills.

Overall, even as a fresher in a shadow role, I have consistently shown ownership by being accountable for my tasks, proactively learning beyond expectations, and ensuring that my contributions add value to the project and team.

Share an instance where you took responsibility for an error or tough decision. What actions did you take, and what was the result?

Shubham Singh Bisht

19-Dec-2025, 1:14 PM

Performance: 5/5 ★ Outstanding Expectation

During my work in a shadow role on the IBL Banking CRM project, I once took responsibility for an error that occurred while working on a small configuration task assigned by my senior. After completing the task, I realized during validation that a related field mapping was not behaving as expected due to an oversight in my understanding of the existing configuration. Instead of ignoring it or waiting for it to be noticed later, I immediately informed my senior, explained the root cause clearly, and took full responsibility for the mistake. I then worked proactively to correct the issue by reviewing the configuration again, validating the fix in the test environment, and ensuring that no related functionality was impacted. I also documented the learning from this experience so that similar mistakes could be avoided in the future. As a result, the issue was resolved quickly without impacting delivery timelines, and I gained valuable learning about the importance of thorough validation and understanding dependencies before making changes. This experience strengthened my sense of accountability and helped me become more careful and confident in handling future tasks.

Mention a new skill or knowledge you acquired this year that significantly improved your work performance or productivity.

Shubham Singh Bisht

19-Dec-2025, 1:14 PM

Performance: 4/5 ★ Exceeding Expectation

One major change I adapted to this year was transitioning from my initial learning phase into working in shadow roles across two different enterprise projects — the IBL Banking CRM project and the Infosys project. As a fresher, adjusting to complex project structures, new business domains, and different team working styles was challenging. My approach was to first observe and understand rather than rush into execution. I spent time learning the project architecture, reviewing existing configurations and documentation, and understanding how requirements were implemented in real scenarios. To adapt effectively, I proactively asked clarifying questions, documented my learnings, and sought regular feedback from senior team members. I also broke down complex tasks into smaller steps and validated my understanding before making any changes. This helped me gradually build confidence while ensuring accuracy. Through this experience, I learned the importance of flexibility, continuous learning, and clear communication in a dynamic corporate environment. I also learned that adapting quickly to change requires patience, openness to feedback, and a proactive mindset—especially as a fresher working on large-scale projects.

Provide an example of how you adapted to a major change or challenge. What was your approach, and what did you learn?

Shubham Singh Bisht

19-Dec-2025, 1:14 PM

Performance: 5/5 ★ Outstanding Expectation

One major change I adapted to this year was transitioning from my initial learning phase into working in shadow roles across two different enterprise projects — the IBL Banking CRM project and the Infosys project. As a fresher, adjusting to complex project structures, new business domains, and different team working styles was challenging. My approach was to first observe and understand rather than rush into execution. I also learned that adapting quickly to change requires patience, openness to feedback, and a proactive mindset—especially as a fresher working on large-scale projects.

Describe a situation where effective collaboration and communication within your team led to a successful outcome.

Shubham Singh Bisht

19-Dec-2025, 1:14 PM

Performance: 4/5 ★ Exceeding Expectation

While working in a shadow role on the IBL Banking CRM project, effective collaboration and communication within the team played a key role in ensuring smooth task completion and successful outcomes. As a fresher, I worked closely with senior team members who guided me through small configuration and validation tasks. To ensure clarity, I regularly communicated my understanding of the requirements, shared progress updates, and asked questions whenever something was unclear. This open communication helped avoid misunderstandings and ensured that my work aligned with overall project expectations. During one instance, while validating a change, I noticed a potential dependency that could impact another part of the CRM flow. I immediately communicated this observation to my senior, and we collaboratively reviewed the configuration together. Based on the discussion, the team made a minor adjustment, which helped prevent a possible issue later in the process. Similarly, in my current Infosys shadow work, I actively collaborate by observing senior team members, participating in discussions, and

documenting key learnings. Clear communication and teamwork have helped me adapt quickly and contribute more effectively, even in a learning role.

Through these experiences, I learned that effective collaboration, timely communication, and openness to feedback are essential for successful delivery, especially in complex enterprise projects.

Share how you've constructively given or received feedback and how it positively influenced your performance or growth.

 Shubham Singh Bisht

19-Dec-2025, 1:14 PM

Performance: 4/5 ★ Exceeding Expectation

I actively sought and received constructive feedback from my senior team members to improve my performance and learning. As a fresher, after completing assigned tasks, I regularly asked my seniors for feedback on both my technical approach and understanding of business requirements. In one instance, I received feedback that I should focus more on validating dependencies and edge cases before sharing my work. I took this feedback positively and immediately incorporated it into my workflow by performing more detailed checks and documenting validation steps.

This change significantly reduced rework and improved the quality of my deliverables. It also helped me gain confidence and trust within the team.

In addition to receiving feedback, I also practiced giving constructive inputs in a respectful manner. While validating a task, I shared a suggestion with my senior regarding a minor improvement in configuration flow, ensuring I clearly explained my reasoning and remained open to discussion. The suggestion was reviewed collaboratively and helped improve the final outcome. Currently, in my Infosys shadow work, I continue to follow this feedback-driven approach by actively seeking guidance, applying suggestions, and continuously refining my skills. Overall, constructive feedback has played a key role in accelerating my learning, improving my performance, and supporting my professional growth.

Highlight a specific achievement where your work directly contributed to customer/client satisfaction or project success.

 Shubham Singh Bisht

19-Dec-2025, 1:14 PM

Performance: 4/5 ★ Exceeding Expectation

.During my work in a shadow role on the IBL Banking CRM project, I actively sought and received constructive feedback from my senior team members to improve my performance and learning.

As a fresher, after completing assigned tasks, I regularly asked my seniors for feedback on both my technical approach and understanding of business requirements. In one instance, I received feedback that I should focus more on validating dependencies and edge cases before sharing my work. I took this feedback positively and immediately incorporated it into my workflow by performing more detailed checks and documenting validation steps. Reflect on a project or task that didn't go as planned. What did you learn, and what support or training would help you grow?

 Shubham Singh Bisht

19-Dec-2025, 1:14 PM

Performance :

One task during my shadow role on the IBL Banking CRM project did not go as planned initially. As a fresher, while working on a small configuration change, I underestimated the complexity of existing dependencies within the CRM workflow. Although the task was completed, additional feedback highlighted areas where further validation and deeper understanding of the business logic were required. I took this as a learning opportunity and worked closely with my senior to review the configuration in detail. Through this process, I learned the importance of thoroughly understanding end-to-end business impact, dependencies, and edge cases before implementing or finalizing changes, especially in complex enterprise systems.

This experience helped me improve my approach by slowing down, asking more clarifying questions upfront, and validating changes more rigorously. It also reinforced the value of peer reviews and open communication.

To grow further, structured support such as hands-on technical training, deeper exposure to Salesforce best practices, and guided code/configuration reviews would be highly beneficial. Continued mentorship from senior team members and exposure to real-world use cases will help me strengthen my technical confidence and contribute more effectively to future projects.

Objectives

Maintain Billability

Q3-2025 (01 Jul 2025 - 30 Sep 2025)

Key Result-1

90%

01 Jul 2025 - 30 Sep 2025

Shubham Singh Bisht

19-Dec-2025, 1:28 PM

Performance: 4/5 ★ 61% - 80% Completed

During the period 01 July 2025 to 30 September 2025, I was primarily engaged in training and shadow project assignments, and was not officially tagged as a billable resource.

As a fresher, this phase was focused on building technical foundations, understanding enterprise project workflows, and supporting ongoing projects such as the IBL Banking CRM project and onboarding activities related to the Infosys project. While my role was non-billable during this period, I utilized the time productively by contributing through validation, testing, documentation, and learning-based support activities under senior guidance.

This phase has helped me prepare to take on billable responsibilities in upcoming project engagements, and I am actively working towards contributing as a billable resource in the next evaluation cycle.

Dedicated project win

Competencies

Coding Quality & Standards

Behaviour-1

Clean, well-documented, efficient code, Code follows best practices and passes peer review with <10% required rework. Proper error handling, security & performance considerations

Shubham Singh Bisht

19-Dec-2025, 1:28 PM

Performance: 4/5 ★ Exceeding Expectation

While working in shadow roles on the IBL Banking CRM project and currently in the Infosys project, I consistently focus on maintaining high coding quality and adherence to standards, even when handling small or guided tasks.

I ensure that my code and configurations are clean, structured, and well-documented, following established project conventions and Salesforce best practices. Before submitting work for peer review, I validate logic thoroughly, check related dependencies, and perform basic testing to minimize rework and ensure correctness.

I actively incorporate feedback received during code reviews and use it to continuously improve my approach, which has helped reduce rework over time. I also pay close attention to error handling, security, and performance considerations, especially given the sensitivity of banking-related systems, by following access control guidelines and avoiding unnecessary processing. Overall, my focus has been on delivering review-ready, maintainable, and secure solutions that align with team standards and contribute positively to project quality.

Shadow Project Implementations / Dedicated Project

Behaviour-1

Tracks hands-on execution, ticket resolution, debugging, configurations, and the ability to deliver real-world tasks.

Shubham Singh Bisht

19-Dec-2025, 1:28 PM

Performance: 5/5 ★ Outstanding Expectation

As a fresher, I supported delivery by working on assigned tickets and small tasks, including configuration updates, validation, testing, and basic debugging. I ensured that each task was completed after clearly understanding requirements, reviewing existing logic, and validating changes in the appropriate environment before sharing them for review. When issues or unexpected behavior were observed, I assisted in debugging by analyzing configurations, checking dependencies, and replicating scenarios to identify root causes. I regularly communicated findings with senior team members, which helped resolve tickets efficiently and avoid repeat issues.

Through these shadow assignments, I have demonstrated the ability to execute real-world tasks responsibly, adapt to project standards, and continuously improve my hands-on skills. This exposure has prepared me to take on increased responsibility and contribute more independently in future project implementations.

Contribution to Product / Project / Solution

Evaluates whether a resource is contributing to projects, product development, or solution building, and how many engagements they handle.

Shubham Singh Bisht

19-Dec-2025, 1:28 PM

Performance: 5/5 ★ Outstanding Expectation

During this evaluation cycle, I have contributed to project execution and solution support through my involvement in shadow roles on the IBL Banking CRM project and the Infosys project.

In the IBL project, I supported solution building by assisting with requirement understanding, configuration validation, testing, and small implementation tasks under senior guidance. My contributions helped ensure quality delivery by identifying dependencies, validating changes, and supporting smoother handovers.

Currently, in the Infosys project, I am contributing by actively learning project architecture, supporting senior developers, and participating in implementation and validation activities as part of shadow assignments. I consistently document learnings and apply feedback to improve my effectiveness across tasks.

In terms of engagements, I have handled multiple parallel responsibilities, balancing shadow project work, assigned tasks, and continuous upskilling. This has enabled me to contribute reliably across engagements while preparing to take on increased ownership in future project or product implementations.

Overall, my contributions have supported project stability, solution quality, and team efficiency, while building a strong foundation for more independent delivery.

Billable Hours & Utilization

Assesses work efficiency & productivity, Productivity in billable vs. non-billable tasks.

Shubham Singh Bisht

19-Dec-2025, 1:28 PM

Performance: 4/5 ★ Exceeding Expectation

During this evaluation period, I maintained a focused and disciplined approach to work efficiency and utilization, balancing both billable and non-billable activities effectively.

In my shadow role on the IBL Banking CRM project, I contributed to billable activities through task support, configuration validation, testing, and issue analysis under senior guidance. I ensured that assigned work was completed within timelines and aligned with project expectations.

Alongside this, I utilized non-billable time productively by upskilling, understanding project architecture, reviewing existing implementations, and incorporating feedback from seniors. This preparation helped me improve the quality and speed of my billable contributions over time.

Currently, in the Infosys project, I continue to manage my time efficiently by prioritizing assigned tasks, actively participating in shadow work, and using learning time to quickly adapt to project requirements.

Overall, I have demonstrated effective utilization by ensuring that both billable and non-billable efforts contribute directly to project readiness, productivity, and my ability to take on increased responsibilities in future engagements.

Escalations

Number of escalations due to mistakes, missed deadlines, poor-quality work., Shows improvement in quality control over time.

Shubham Singh Bisht

19-Dec-2025, 1:28 PM

Performance: 2/5 ★ Approaching Expectation

During this evaluation period, I have maintained a strong focus on quality and accountability, resulting in no major escalations due to missed deadlines or poor-quality work.

As a fresher working in shadow roles on the IBL Banking CRM project and the Infosys project, I ensured that tasks assigned to me were completed with proper validation and shared for review well within timelines. Whenever I faced uncertainty or potential risks, I proactively communicated with senior team members to clarify requirements and avoid issues before they could escalate.

Over time, I have shown continuous improvement in quality control by incorporating feedback, performing more thorough checks, and better understanding dependencies before finalizing any work. This approach helped reduce rework and prevented avoidable issues.

Overall, my focus on early communication, careful validation, and learning from feedback has helped maintain quality standards and minimize the need for escalations.

Reporting Documentation, & Case Study

Behaviour-1

Maintains clear and detailed documentation

Shubham Singh Bisht

19-Dec-2025, 1:28 PM

Performance: 4/5 ★ Exceeding Expectation

During this evaluation period, I consistently maintained clear and structured documentation while working in shadow roles on the IBL Banking CRM project and the Infosys project.

For each assigned task, I documented requirements understanding, configuration details, validation steps, and key learnings to ensure clarity and traceability. This helped me track my progress, reduce repeated queries, and align my work with project expectations.

I also maintained personal notes and reference documents while shadowing senior team members, capturing business flows, dependencies, and best practices. These notes helped me improve my understanding and allowed me to apply learnings more effectively in subsequent tasks.

Whenever required, I shared my documentation with seniors for review, which supported smoother collaboration and knowledge transfer. Overall, maintaining clear documentation has improved my productivity, reduced rework, and supported consistent quality across tasks.

Teamwork & Collaboration

Behaviour-1

Works cohesively with peers & cross-functional teams. and Contributes to team discussions & problem-solving.

Shubham Singh Bisht

19-Dec-2025, 1:28 PM

Performance: 5/5 ★ Outstanding Expectation

During this evaluation period, I worked cohesively with peers, senior team members, and cross-functional stakeholders while contributing in shadow roles on the IBL Banking CRM project and the Infosys project.

As a fresher, I actively collaborated by communicating clearly, sharing progress updates, and seeking clarification whenever required to ensure alignment with team expectations. I participated in team discussions by listening carefully, asking relevant questions, and sharing observations from validation or testing activities.

During problem-solving situations, I supported the team by analyzing configurations, identifying dependencies, and sharing findings with senior members in a timely manner. This collaborative approach helped resolve issues efficiently and ensured smoother task execution. Overall, my focus has been on maintaining a positive team dynamic, being open to feedback, and contributing constructively to discussions and problem-solving efforts, which has helped strengthen teamwork and delivery effectiveness.

Attendance & Punctuality

Behaviour-1

Regular attendance & on-time task completion.

Shubham Singh Bisht

19-Dec-2025, 1:28 PM

Performance: 5/5 ★ Outstanding Expectation

Throughout this evaluation period, I have maintained regular attendance and punctuality, ensuring consistent availability during working hours and timely participation in team meetings and project activities.

I plan my work effectively to ensure that assigned tasks are completed on time, even while balancing shadow project responsibilities and learning activities. Whenever there were dependencies or clarifications required, I communicated proactively to avoid delays.

My consistent attendance and disciplined approach to time management have helped me stay aligned with project timelines and contribute reliably to team deliverables.

Behaviour-2

Track record of presence, timeliness, reliability.

Shubham Singh Bisht

19-Dec-2025, 1:28 PM

Performance: 5/5 ★ Outstanding Expectation

Throughout this evaluation period, I have maintained regular attendance and punctuality, ensuring consistent availability during working hours and timely participation in team meetings and project activities.

I plan my work effectively to ensure that assigned tasks are completed on time, even while balancing shadow project responsibilities and learning activities. Whenever there were dependencies or clarifications required, I communicated proactively to avoid delays.

My consistent attendance and disciplined approach to time management have helped me stay aligned with project timelines and contribute reliably to team deliverables.

Behaviour-3

Maintains regular attendance and punctuality

Shubham Singh Bisht

19-Dec-2025, 1:28 PM

Performance: 5/5 ★ Outstanding Expectation

Throughout this evaluation period, I have maintained regular attendance and punctuality, ensuring consistent availability during working

hours and timely participation in team meetings and project activities.

I plan my work effectively to ensure that assigned tasks are completed on time, even while balancing shadow project responsibilities and learning activities. Whenever there were dependencies or clarifications required, I communicated proactively to avoid delays. My consistent attendance and disciplined approach to time management have helped me stay aligned with project timelines and contribute reliably to team deliverables.

Behaviour-4

Timesheet, meeting punctuality, absence frequency

Shubham Singh Bisht

19-Dec-2025, 1:28 PM

Performance: 5/5 ★ Outstanding Expectation

Throughout this evaluation period, I have maintained regular attendance and punctuality, ensuring consistent availability during working hours and timely participation in team meetings and project activities.

I plan my work effectively to ensure that assigned tasks are completed on time, even while balancing shadow project responsibilities and learning activities. Whenever there were dependencies or clarifications required, I communicated proactively to avoid delays. My consistent attendance and disciplined approach to time management have helped me stay aligned with project timelines and contribute reliably to team deliverables.

Learning Attitude & growth Mindset

Behaviour-1

Actively learns new technologies, is aware of technological changes, and follows the releases.

Shubham Singh Bisht

19-Dec-2025, 1:28 PM

Performance: 5/5 ★ Outstanding Expectation

During this evaluation period, I consistently demonstrated a strong learning attitude and growth mindset, actively working to improve my technical and functional skills.

As a fresher involved in shadow roles on the IBL Banking CRM project and the Infosys project, I proactively learned Salesforce CRM concepts, project-specific configurations, and enterprise delivery practices. I regularly reviewed release notes, followed best practices, and stayed aware of updates relevant to the platform and project requirements.

I actively applied new learnings to my assigned tasks by improving validation approaches, understanding dependencies better, and incorporating feedback from senior team members. I also maintained personal learning notes and explored additional resources to strengthen my understanding of real-world implementations.

Overall, my continuous learning approach has helped me adapt quickly, improve task quality, and prepare myself to contribute more independently as project responsibilities increase.

Behaviour-2

Actively learns new strategies and technologies

Shubham Singh Bisht

19-Dec-2025, 1:28 PM

Performance: 5/5 ★ Outstanding Expectation

During this evaluation period, I consistently demonstrated a strong learning attitude and growth mindset, actively working to improve my technical and functional skills.

Ability to adapt & Accept Feedback

Behaviour-1

Accepts feedback positively and applies improvements.

Shubham Singh Bisht

19-Dec-2025, 1:28 PM

Performance: 5/5 ★ Outstanding Expectation

Throughout this evaluation period, I have consistently demonstrated the ability to adapt quickly and accept feedback positively while working in shadow roles on the IBL Banking CRM project and the Infosys project.

As a fresher, I actively seek feedback from senior team members after completing tasks to better understand areas of improvement. I take this feedback constructively and apply it in subsequent tasks by refining my approach, improving validation steps, and aligning more closely with project standards.

I have adapted my working style based on feedback related to understanding dependencies, documenting work clearly, and validating changes thoroughly. This has helped reduce rework and improve the overall quality of my deliverables over time.

Overall, my openness to feedback and willingness to adapt have contributed significantly to my professional growth, improved performance, and ability to collaborate effectively within the team.

Behaviour-2

Behavioral change based on feedback received.

Shubham Singh Bisht

19-Dec-2025, 1:28 PM

Performance: 5/5 ★ Outstanding Expectation

Throughout this evaluation period, I have consistently demonstrated the ability to adapt quickly and accept feedback positively while working in shadow roles on the IBL Banking CRM project and the Infosys project.

Overall, my openness to feedback and willingness to adapt have contributed significantly to my professional growth, improved performance, and ability to collaborate effectively within the team.

Certifications and Continuous Learning

Behaviour-1

Successful Completed 3month TrainingCompleted Trailhead modules, Superbadges, and at least one relevant Salesforce Certification.

Shubham Singh Bisht

19-Dec-2025, 1:28 PM

Performance: 4/5 ★ Exceeding Expectation

During this evaluation period, I successfully completed the 3-month structured training program, which helped me build a strong foundation in Salesforce and enterprise project practices.

I actively completed multiple Trailhead modules and hands-on exercises related to Salesforce fundamentals, configurations, and real-world use cases. These modules helped me understand core concepts such as objects, fields, validation rules, flows, and overall CRM workflows, which I applied during my shadow work on the IBL Banking CRM project and the Infosys project.

In addition, I have been working towards advanced Trailhead learning paths and Superbadges to strengthen my hands-on expertise. I am currently preparing for a relevant Salesforce certification and plan to complete it in the upcoming cycle to further enhance my technical proficiency.

Overall, my focus has been on continuous learning, practical application, and building a strong technical foundation to contribute more effectively to projects.

Technology Proficiency - Salesforce

Behaviour-1

>>Hands-on expertise with Apex, LWC, SOQL, Triggers, Flows >>Familiarity with APIs, integrations, CI/CD, and DevOps (Gearset, Copado) >>Understanding of Salesforce Clouds (Sales, Service, Marketing, etc.)

Shubham Singh Bisht

19-Dec-2025, 1:28 PM

Performance: 5/5 ★ Outstanding Expectation

These modules helped me understand core concepts such as objects, fields, validation rules, flows, and overall CRM workflows, which I applied during my shadow work on the IBL Banking CRM project and the Infosys project.

In addition, I have been working towards advanced Trailhead learning paths and Superbadges to strengthen my hands-on expertise. I am currently preparing for a relevant Salesforce certification and plan to complete it in the upcoming cycle to further enhance my technical proficiency.

Overall, my focus has been on continuous learning, practical application, and building a strong technical foundation to contribute more effectively to projects.

Communication & Presentation Skill

Behaviour-1

Clearly communicates ideas in meetings. Able to Write structured emails, reports, and presentations.

Performance: 4/5 ★ Exceeding Expectation

During this evaluation period, I successfully completed the 3-month structured training program, which helped me build a strong foundation in Salesforce and enterprise project practices.

I actively completed multiple Trailhead modules and hands-on exercises related to Salesforce fundamentals, configurations, and real-world use cases. These modules helped me understand core concepts such as objects, fields, validation rules, flows, and overall CRM workflows, which I applied during my shadow work on the IBL Banking CRM project and the Infosys project.

In addition, I have been working towards advanced Trailhead learning paths and Superbadges to strengthen my hands-on expertise. I am currently preparing for a relevant Salesforce certification and plan to complete it in the upcoming cycle to further enhance my technical proficiency.

Overall, my focus has been on continuous learning, practical application, and building a strong technical foundation to contribute more effectively to projects.

Behaviour-2

Clearly communicates ideas in meetings. Able to Write structured emails, reports, and presentations.
